Source file:

1. Makefile:

Adapted from <https://github.com/bminch/iceBlinkPico/tree/main/examples/blink>.
The filename was changed from blink to main, the module name from top to main,
and the pin file path to the current folder.

2. **iceBlinkPico.pcf:**

The pin assignments came from
<https://github.com/bminch/iceBlinkPico/tree/main/examples/common>. This file,
which is for pin numbers, is unchanged.
